

Designing with Specks

Andrew Smith

ANDREW SMITH

Presentation Overview:

Mood Cloud Project

- What is it?
- Who uses it?
- How does it work?

Potential of Specks:

- Potential for 3D design
- Implications
- Implementations

ANDREW SMITH

Design Thinking

Mood Cloud

Stress Communicator

(as seen on Australian TV!)

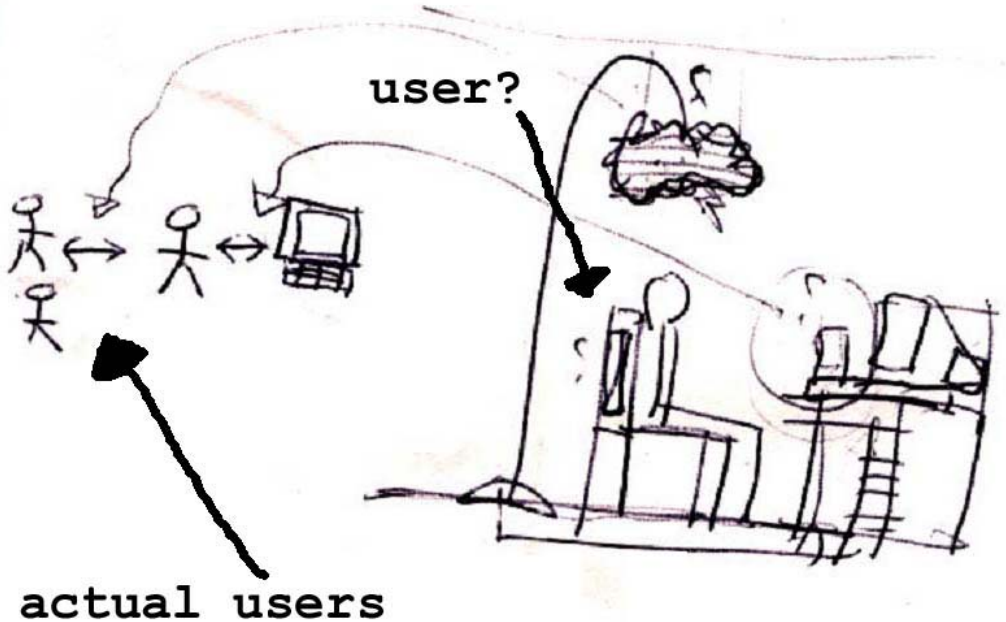

ANDREW SMITH

Design Thinking

The user is technically the person using the keyboard.

However, the product performs for the benefit of those around him (colleagues). Therefore they are the real users. *That's who the product is designed for.*

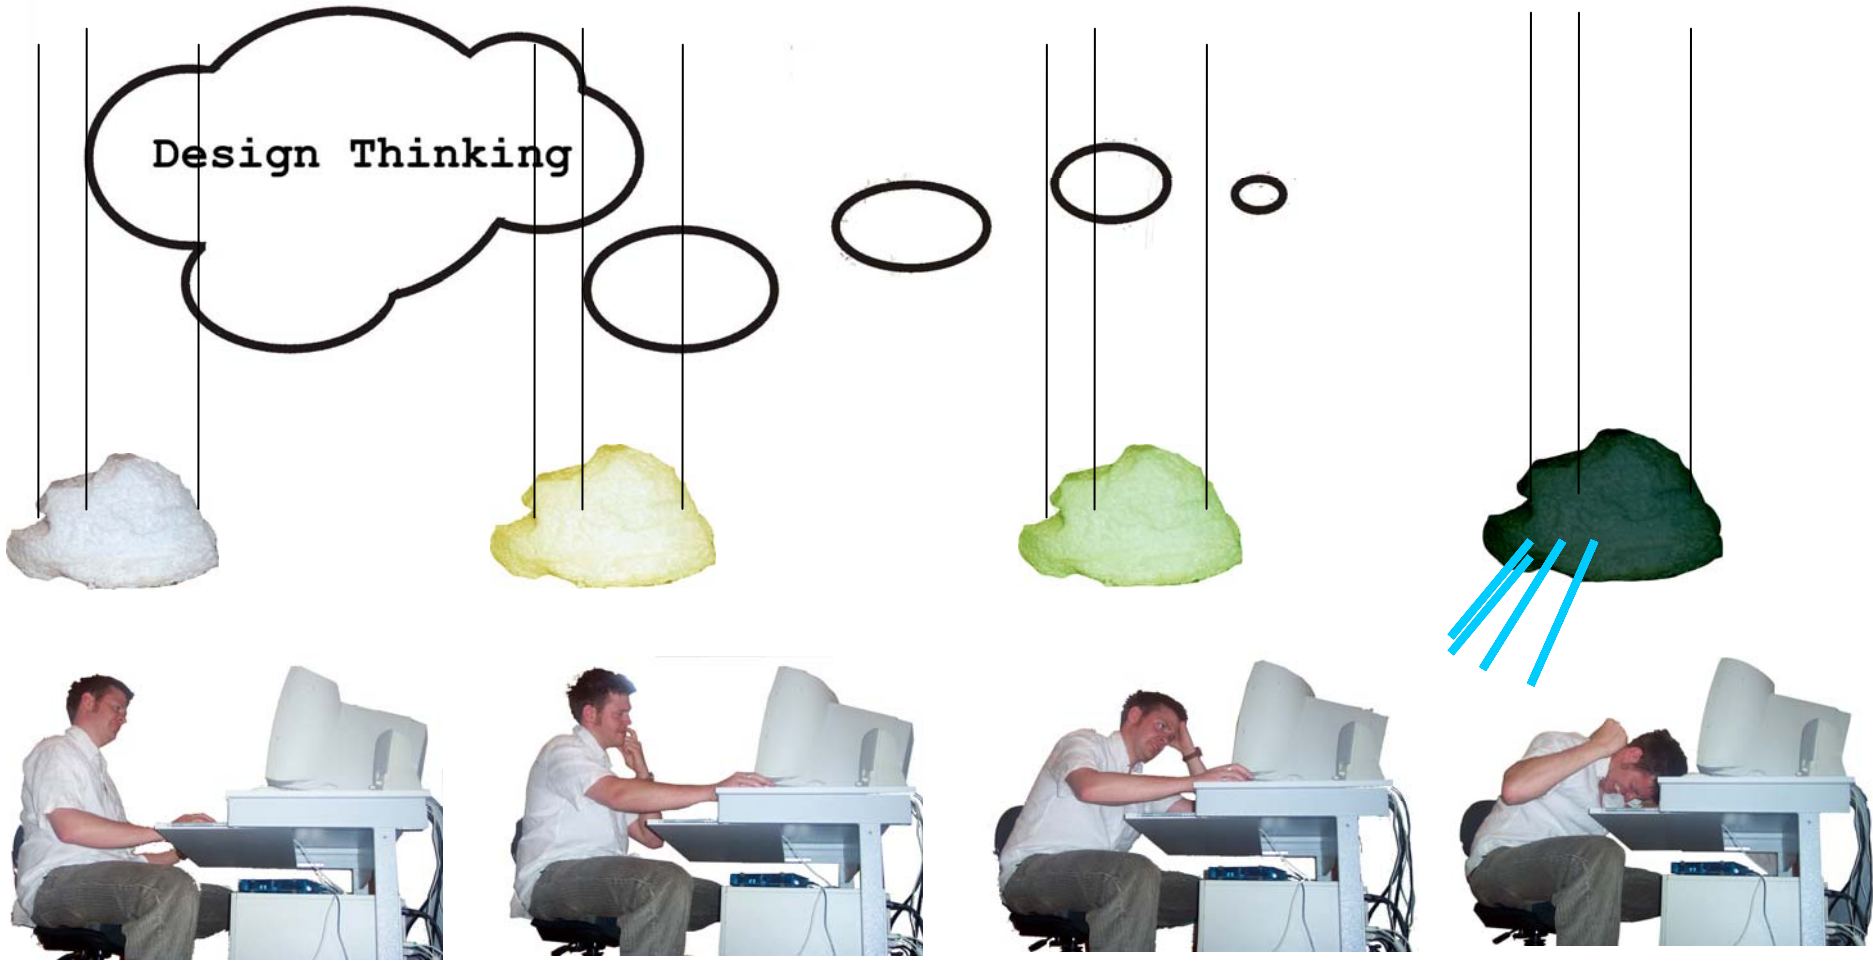

ANDREW SMITH

Design Thinking

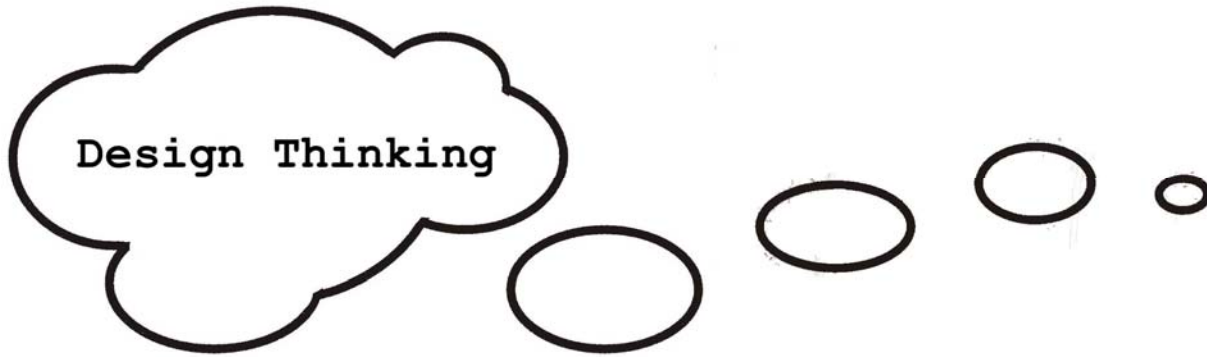

How it works??

ANDREW SMITH

As the user becomes increasingly stressed the cloud gets darker, until it strobos to express that the user is severely stressed.

ANDREW SMITH

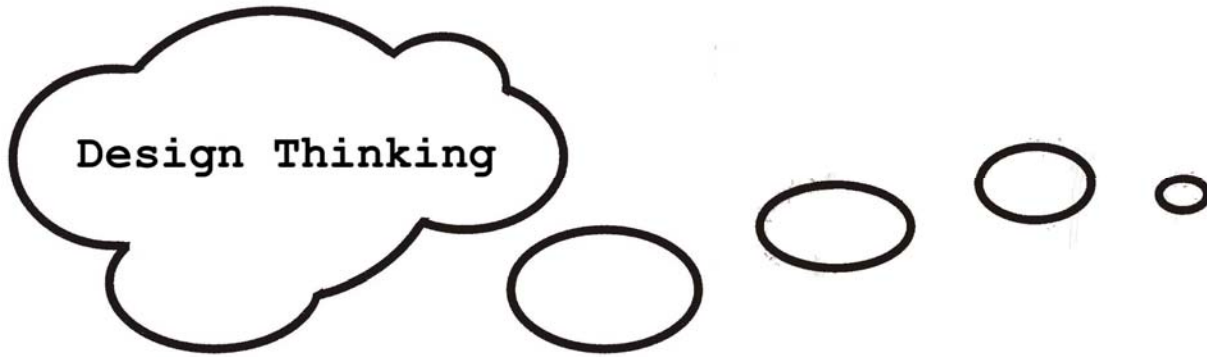

Specks - The potential effect on design.

Specks allow more design concepts to become reality.

They bring more concepts to life.

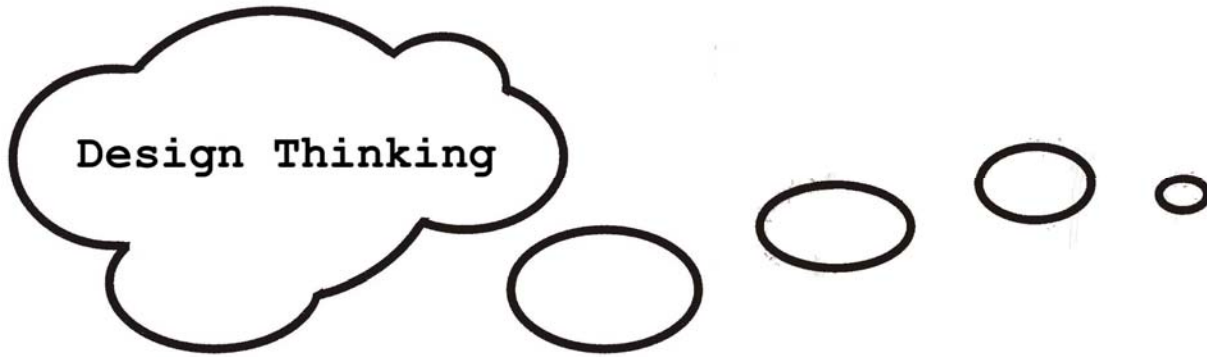

ANDREW SMITH

Potential Implementations of Specks.

- Intelligent objects / environments.
- Sensitive objects / environments.
- Responsive objects / environments.

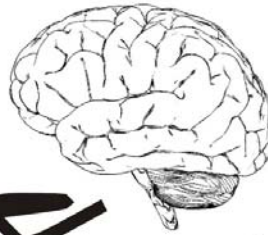

ANDREW SMITH

What Andy intends to do next???????

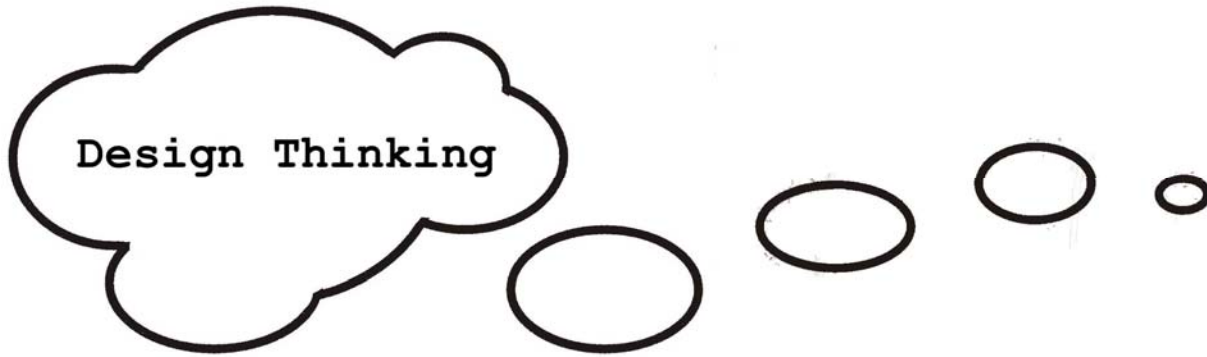

ANDREW SMITH

Design Thinking

New Ideas
on their way!?

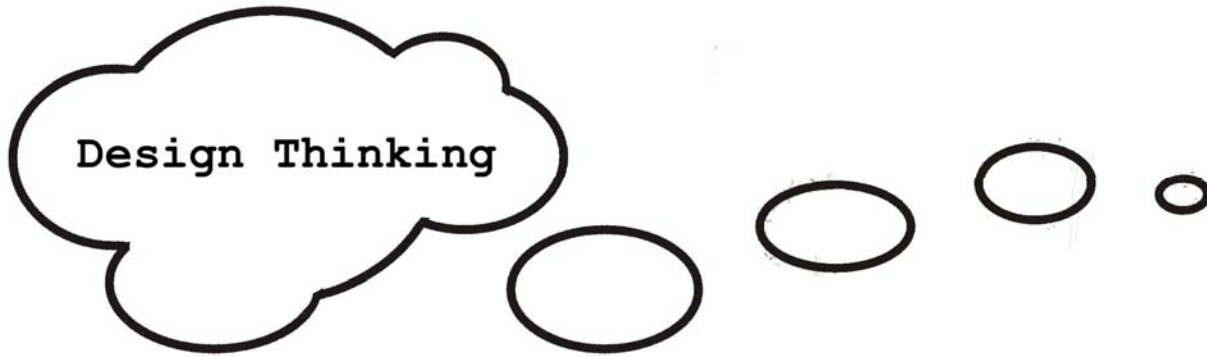

ANDREW SMITH

Questions?

...don't be shy
