

Future scenarios

Wanless 2003

- Scenario where citizens take responsibility for their own health and management of common illness
- Fundamental change in health services away from patching up ill health to guiding and supporting citizens to manage themselves

Drivers

- Demographics
- Research
- Diagnostics
- Costs
- Society's view of Government

paintings

- High blood pressure will become a personal responsibility
- Access a range of advice and services including medication
- Mixed health and illness services
- Diabetes, arthritis, asthma, heart disease

sculptures

- Cancer will be a shared endeavour
- Range of preventive and supportive services mixed with hospital expertise
- Diagnostics
- Ageing, joint disease, inflammation, neurological

ceramics

- **Recovery and rehabilitation** a shared and personal enterprise
- Range of health and ill-health services
- Remote monitoring and assessment

technologies

- Personal and expert diagnostics
- Remote physiological monitoring
- Delivery of therapeutics and monitoring of effect
